

Short Bangs

Big Wreck

When getting caught in spiderwebs
And when there's no more gold
When all this has now to seem mad
And just do as you're told

The rest'll never be enough
You keep what you can take away

When there's another marker up ahead
Mm, but the fog is in the way
It always goes over my head
I guess it's not my day

When everything won't be enough
We keep what we can take away
I never said I've had enough
I never said we'd find our way

As long as we're together on one of my better days
If we just stand together, we're gonna make everything okay
Because you must get tired of pushing the future away

Didn't mean to wake you from your chats
Or to get in your way
But, the future is a game of chance
That we all get to play

When everything won't be enough
We keep what we can take away

As long as we're together on one of my finer days
If we just stand together, we're gonna make everything okay
Because you must get tired of pushing the future away

As long as we're together on one of my finer days
If we just stand together, we're gonna make everything okay
Because you must get tired of pushing the future
I said, you must get tired of pushing the future away
