

Summerlong

Big Wreck

As summer breaks up high
And innocence is turned to ash
I'm sure you don't recall
You burned a hole the best part uptil fall

It's over way
It's always there

Hey I still feel the freeze and burn that was there all summer
long
Day by day try to wash it off of me
I still feel the freeze and burn that was there all summer long
Day by day gonna become part of me

As someone falls apart
And when your joke has gone too far
The sun thinks you won't recall
It's everything that means nothing at all

The same old way
It's always there

I still feel the freeze and burn that was there all summer long
Day by day try to wash it off of me
I still feel the freeze and burn that was there all summer long
Day by day try to become part of me

And while I'm still trying to understand
Just do your rest
This revelation's cursed
Find out who's really got to make
I never heard, I never said a word

The same old way
It's always there

I still feel the freeze and burn that was there all summer long
Day by day try to wash it off of me
I still feel the freeze and burn that was there all summer long
Day by day gonna become part of me
Day by day gonna become part of me
Day by day till it becomes part of me
