

## Star Now

**Bilal**

You took the rain  
She closed her eyes and called his name  
The oceans crashed, the thunder came  
She fell into his arms  
A virgin's tears rode from her eyes  
But all he could think about was pussy

It was made for you  
It was made for you  
It was made for you

Star now  
You shine like a star now  
Your skin will glow like a star now  
Your eyes will glitter like a star now  
Your friends all know you're a star now  
You have a smile like a star now  
Show the world your stars now  
Oh to shine forever more
