

## Day

Bill Callahan

Some people are a sickness on this land  
They're killing, they're taking  
They're stealing whatever they can  
Anything, anything, anything that is not bolted down  
Your life, your money, your heart, your faith, your bike  
Anything, anything, anything that is not bolted down

Learn from the animals, monkeys do  
Monkeys do, monkeys do piggish things too  
Learn from the vegetables, monkeys do, monkeys do

The way they strive towards the light  
A small potato in the blight  
Still strives toward the light  
I know it's as dark as night  
It's as dark as night  
It is day though

Some would ask, what are we to do  
With a world that crumbles to the touch?  
A world that spins and dies where it stands  
Like trying ain't enough?

To family is all you can do  
To family is all you can do  
Even if it's just us two  
To family is all you can do

And strive toward the light  
It's as dark as night  
Strive toward the light  
Strive toward the light  
I know it's as dark as night  
I know it's as dark as night  
It is day though
