Before

Billy Crawford

Looking out my window
I see you walking out of my door, my door
Feeling mixed emotions
You never ever walked out before, before

Before when we were lovers
Before when we were friends
Before the party ended
Before the end began

Thinking back on our love
I gave you everything that I had, that I had
Now it's time to more on
The memories they make me feel bad, make me feel bad

Before when we were lovers
Before when we were friends
Before the party ended
Before the end began

We laughed until the sun rose
We always wanted more
We never left each others side
But that was all before

I never ever should have let you go
I'll always love you, girl, I hope you know
My heart will never ever be the same
Without you, girl, 'cause I have you, girl
