Complicated

Billy Currington

Oh, oh
Your lightenin' strikes me, and I can't breathe
What I say might be way too deep

I only wanna be with you, be with you
All the time

Don't you know it's complicated, but we're on fire
You've always been my one desire
Don't have to say it, you feel it too
Don't make sense, it's so complicated
Hold me here for life, take us back in time
Let's just make this right tonight

Your secret breaks me 'cause nothing's changed
We've held on for so long, we should let go but we can't

I only wanna kiss on you, kiss on you
Tonight

Don't you know it's complicated, but we're on fire
You've always been my one desire
Don't have to say it, you feel it too
Don't make sense, it's so complicated
Hold me here for life, take us back in time
Let's just make this right tonight

Honestly, I just want you, just want you
For life
We're complicated, but we're on fire
You've always been my one desire

Don't you now it's complicated, but we're on fire
(Don't you know you've been) Always been my one desire
Don't have to say it, feel it too (Don't have to say it)
Don't make sense, it's so complicated (It don't make sense)
(Hold on, on) Hold me here for life, take us back in time
(Hold on) Let's just make this right tonight

(Make this right tonight) Complicated
(Make this right tonight) We're on fire
(Make this right tonight, make this right tonight) You've always been my one desire
Don't have to say it, you feel it too
Don't make sense, it's so complicated
Hold me here for life, take us back in time
Let's just make this right tonight
