

Confess

Billy Currington

When I think of you
I feel a light come shining through
I'm looking at one of a kind
It's got me all messed up inside

It's all about the way you smile
I watch you dance it drives me wild
But here's the truth
So now you know now

Baby I confess
You're all up in my head
What I have in mind
Is your body next to mine
All I'm trying to say
Is that you're perfect in every way
No need to guess
Baby I confess

I confess, I confess
I confess, I confess

Your eyes outshine the stars
There's magic in your heart
Can't keep this secret
That's the way I feel
So can we get close and make this real

It's all about the way you smile
I watch you dance it drives me wild
But here's the truth
So now you know now

Baby I confess
You're all up in my head
What I have in mind
Is your body next to mine
All I'm trying to say
Is that you're perfect in every way
No need to guess
Baby I confess

I confess I confess
I confess I confess

I'd regret if didn't say this
So hold me baby and let's kiss
I confess you're all up in my head
I confess you're all up in my head

Baby I confess
You're all up in my head
What I have in mind
Is your body next to mine
All I'm trying to say
Is that you're perfect in every way
No need to guess

Baby I confess

I confess, I confess
I confess, I confess
I confess, I confess
I confess, I confess
I confess, I confess
I confess, I confess
