

## Spend Another Night

Billy Gilman

I instantly knew when I saw you  
You and I would be forever  
Hearts never apart true from the start  
To each other and together  
There's nothing we can't do  
And until the end of time  
If you tell me you'll be mine  
I'm Never gonna spend another night  
Without you in my dreams  
For the rest of my life  
I'm gonna reach out to you honestly and try  
To give you what you need  
With all of my might  
'Cause nothing has ever felt so real and so right  
I'm never gonna spend another night  
(without you)  
You are so in my heart  
Even alone in the dark I can feel the light of our love shining

We are so meant to be  
That we're definitely destiny  
And there's no denying  
That I love you  
Though it's so cliché  
There's nothing else to say  
I'm Never gonna spend another night  
Without you in my dreams  
For the rest of my life I'm gonna reach out to you honestly and  
try  
To give you what you need  
With all of my might  
No love has ever felt so real and so right  
I'm never gonna spend another night  
(without you)
