

# Nothing to Fear

Billy Idol

When you are small  
They make you crawl  
They make you run away  
And then you grow tall  
Like a skyscraper, you start to fall

There was a time  
When the sun would always shine  
Now there's a day  
When the pain just won't go away

Dreams are made and broken  
In my mind  
Do you feel the same inside?

Nothing to fear  
Nothing to fear (but fear itself)  
I'm making it clear  
That I am not afraid

Nothing to fear  
I say the future is here (so heal yourself)  
It's a new frontier  
There's nothing to fear  
In my world

I had a girl  
She was young, like a summer wind  
But seasons they change  
And the cold, began comin' in

Now if I feel bad  
I stop, and I turn around  
I tell myself it's me  
Or this crazy town

Dreams are made and broken  
In my mind  
Do you feel the same inside?

Nothing to fear  
Nothing to fear (but fear itself)  
I'm making it clear  
That I am not afraid

Nothing to fear  
Nothing to fear (so heal yourself)  
I'm making it clear  
There's nothing to fear  
In my world

When you walk alone  
You're not on your own  
If you realize  
What's behind my eyes

So please understand

I'm holding your hand  
I'm leading you blind  
Inside my mind  
So let your troubles fly, yeah

Dreams are made and broken  
In my mind  
Do you feel the same inside?

Dreams are made and broken  
In my mind

Nothing to fear  
Nothing to fear  
I'm making it clear  
That I am not afraid

Nothing to fear  
I say the future is here  
It's a new frontier  
There's nothing to fear

Nothing to fear  
Nothing to fear  
I'm making it clear  
That I am not afraid

Nothing to fear  
You've faced the new frontier  
So sound the 'all clear'  
There's nothing to fear  
But fear itself
