

We Gotta Find Love

Billy Ocean

Listen, people

Do we have to live with heartache?
Do we have to live with pain?
Will we find a shelter,
To protect us from the rain?
Oh, I'm talkin' 'bout the future
It's time to make a change
Can't we make it better,
Or will it stay the same?

Hear the thunder
Oh, I can hear the thunder
Feel the rain
Yeah, I can feel the rain
The one thing that we're missin'
So easy to explain

We've got to find somethin' that's better than this
We've got to find love
Until it takes us to the threshold of freedom
We've got to find love
If we wanna find there's no difference between us
We've got to find love
Take away the feelin' that divides and abuses
We've got to find love
Got to find love

We've got to find love
Got to find love
We've got to find love

We should try to climb the mountain
So everyone can see
The wind of change is comin' round
The way it's ought to be
Let's look for the answer
Believe me when I say
That it's not impossible
Can wait another day

Hear the thunder
Oh, I can hear the thunder
Feel the rain
Yeah, I can feel the rain
If we don't solve this problem
There's no one else to blame

We've got to find somethin' that's better than this
We've got to find love
Until it takes us to the threshold of freedom
We've got to find love
If we wanna find there's no difference between us
We've got to find love
We'll take away the feelin' that divides and abuses
We've got to find love
Got to find love

We've got to find love
Got to find love
We've got to find love

Every night I pray
There will come a day
We stand as one together
(As one together)

Hold onto this dream
Simple as it seems
To look out for each other

We've got to find somethin' that's better than this
We've got to find love
Until it takes us to the threshold of freedom
We've got to find love
If we wanna find there's no difference between us
We've got to find love
We'll take away the feelin' that divides and abuses
We've got to find love

We've got to find love
[Repeat to fadeout]
