

In My Arms

Billy Raffoul

There's a place where the lights burn low and we
We can lay in the afterglow and we
We can say all the things we're thinking out loud
You've been running around my mind and I
I can't help it no matter how I try
Go to sleep and you're all I'm dreaming about

This can't end before it starts

I wanna hold you in my arms
I wanna keep you away from harm
The walls are gonna shake, the fevers gonna break
But I will stay with you
I wanna hold you in my arms

Suddenly I'm an optimist and you
You got rid of the nervous kid when you
Made me feel like we might just make it out

You'll have all of my heart

I wanna hold you in my arms
I wanna keep you away from harm
The walls are gonna shake, the fevers gonna break
But I will stay with you
I wanna hold you in my arms

I'm not gonna be just somebody to leave a scar
I could be the one to pull you out of the dark

But this can't end before it starts

I wanna hold you in my arms
I wanna keep you away from harm
The walls are gonna shake, the fevers gonna break
But I will stay with you
I wanna hold you in my arms
In my arms
In my arms
