

They're Playin' Our Song

Billy Ray Cyrus

Took a long walk just the other day
Through the shadows of my mind
Pretty sure I saw you standing there
For a moment back in time

That smile of yours welcome me back home
To a place where love was young
I look for our tomorrow
Living while we sung

They're playing our song
They're playing our song

Let me take you in my arms, hold you tight
Loving you all through the night
Your sweet lips upon my skin
Feel you once again playing our song

I think back on what you said
And how time goes so fast
Now I look for our tomorrow
Reaching for the past

They're playing our song
They're playing our song

Let me take you in my arms, hold you tight
Loving you all through the night
Your sweet lips upon my skin
Feel you once again

They're playing our summertime in the wind
And even if it's just pretend
Volume's up, the top is down
The love is all around

They're playing our song
They're playing our song
They're playing our song
They're playing our song

They're playing our song
They're playing our song
