

More than words can say

Billy Squier

More than words can say
or the sweetest song that I can play
More than words can say
I love you now
More than you may know
from the simple ways I try to show you
More than words can say
I love you now
They can take you where they want
Will they bring you back
They can give you what they want
They can't give you everything
Walkin' down the road
far away from home
Many miles to go
but it's all right
So much work to do
before my day is through
But when I think of you
my spirits fly
They can hurt you if they want
How are you to know
Desert you when you need them most
I will be there constantly
More than words can say
or the sweetest song that I can play
More than words can say...
But if I can't reach you now
what am I to do
If I can't reach you now
I will reach out constantly
More than words can say
or the sweetest song that I can play
More than words can say
try hard as I may
More than words can say
more with every passing day
More than words can say
I love you now
