

# Groundhogs Day

Billy Woods

Plug said he's taking a break, I couldn't keep a straight face  
'Til he 'splained how they came for the safe  
I was like, "wait, wait, wait"

I wake up and smoke weed  
I wake up and smoke weed

I'm how come we don't have nice things  
Put the chopper to Ethiopia last king  
That's what this thing of ours bring  
Got Addis Ababa jumping like the Bada-Bing

I wake up and smoke weed  
I wake up and smoke weed

Put my apartment on the curb  
Worse for the wear  
And left a pharaoh's curse for whoever next there  
Lost a verse in the move, had to write it again  
Tried to change things up, but came to the same small end

I wake up and smoke weed  
I wake up and smoke weed

Last thing to go was that old cathode ray tube  
Fucking huge, was the shit when it was new  
Chinatown delivery cubes, peep show booths  
Someone kicked the screen in that same afternoon

I wake up and smoke weed  
I wake up and smoke weed

Had the talent, missed your shot  
Hard one to swallow, but it can't be what its not  
No intricate plot needed to put you in a box  
Whether pacing or laid out front the congregation  
Anyone could get knocked

I wake up and smoke weed  
I wake up and smoke weed

Underachieved, still considered one the greats  
I'm from the era of Reggie Miller 8's  
Nothing to be proud of, but I still am  
Truth be told, I remember every single gram  
Wrote his epitaph on the back of the master plan  
Just in case, even though he know the place like the back of his hand

The trees look so good, but the price is so heavy  
I don't know  
I rather talk to your plug first, but negroes is petty  
So here we go!
