Live up ahead
Where it all dies
No one is there for you
You can't hold on
Look in my eyes
You see them start to fall

Do I just stand, watch my body die
Life feels nothing but pain sometimes
Just not knowing wears my skin down
I'm afraid of everything, of everything

How can I feel free
When I feel the sadness
How can I feel free
When I feel the sadness

Circling around my head
What are you after
Are you gonna be okay with the obvious
I need something to recall myself

It's all said and done
Tell me if it's all you wanted
I'm keeping my head down cause
I feel it every day
It's not a dream that's taken over
I know I'm wide awake

How can I feel free
Let it go need to let it go
Just keep me in the moment
Let it go need to let it go
I know I'll be okay

How can I feel free
Need to move through the sadness
How can I feel free
Need to move through the sadness
