

Lens

Bilmuri

Can you hold my hand?
So glad you gave me a chance
'Cause I needed a friend
You understand me
You understand me

No one loves me like you do
No one loves me like you do
I watched the dark fade away
With your hand in mine
Know you're here to stay

You held me in your hands
You take the pain away
Different from everyone else
You didn't push me away
You didn't push me away

No one loves me like you do
No one loves me like you do
I watched the dark fade away
With your hand in mine
Know you're here to stay

'Cause no one loves me like you do
No one loves me like you do
No one loves me like you do
No one loves me like you do
