Tell yourself what you wanna hear  
And find the lie that haunts your tears  
Take a pill to make your dread go away  
Fake your smile so they don't know you're afraid

I wanna hate you for every scar you made  
So I escape to find life in a movie place  
Now I feel alive, now I feel alive

I lost my ends with all their blood  
I won't fight these wars you made  
I've been in the dark, I'm just moving on  
So I forget your fate, hmm

I wanna hate you for every scar you made  
So I escape to find life in a movie place  
Now I feel alive, now I feel alive

I wanna hate you for every scar you made  
So I escape to find life in a movie place  
Now I feel alive, now I feel alive
