Bilmuri

(I swear, it's all I swear)

I've had enough
I won't stay up
Make me feel enough
Just give me novocaine
And take away the pain

I want to run away from everything
Feel the world cover the death in my skin
(I swear, it's all I swear)
I watch you fall down an endless sky
Shame my heart, set flame, the ashes fall away
(I swear, it's all I swear)

I see warmth in my soul
I feel this loneliness fall to the ground
Feel the pain retreat away from these walls
Just give me novocaine
And take away the pain

I want to run away from everything
Feel the world cover the death in my skin
(I swear, it's all I swear)
I watch you fall down an endless sky
Shame my heart, set flame, the ashes fall away
(I swear, it's all I swear)

(All I swear, it's all I swear)
