Fuck the System

Biohazard

We kill each other over nothing at all
And blame each other for taking the fall
We disagree about human rights
There's no discussion, there's only a fight
We fight for our women, our children, our men
But they don't give a fuck about them
We fight to be heard with nothing to say
We fight like savages to get our way

So don't waste your breath
Telling me who's left
Or telling me who's right
Fuck the system

So don't waste your time
All of you and your kind
Trying to divide
Fuck the system

Innocent victims become the slaves
Beautiful cities become our graves
Desperate people they start to pray
While women and children are murdered and raped
Manipulate the people into fighting their wars
Barbaric need to conquer, we always want more
A never-ending battle
Which nobody wins
One slaughter ends
Another begins

So don't waste your breath
Telling me who's left
Or telling me who's right
Fuck the system

So don't waste your time
All of you and your kind
Trying to divide
Fuck the system

Divided we fall

Fuck the system

No more war
No more war
Fuck the system

We're all taught the way to follow their rules
We all learn the same shit from all the same schools
We all believe the nonsense they put on the news
We accept propaganda as the absolute truth
We all forgive the promises that they make and break
We never question the news that we know is fake
We all know this life and our world is at stake
How much more can we take?
How much more can we take?

```
Fuck the system
No more war
No more war
Fuck the system
```
