

## Future (Part 1)

Bipolar Sunshine

All night long [x4]

My future looks brighter  
In your eyes (your eyes)  
So if I ever realize  
I don't played with fire  
In your mind  
We go all night long  
And sometimes through the day  
My future looks brighter  
In your eyes

Famous women in my radar  
Baby you're a star  
But we shine brighter  
When together  
Back turned against the world  
The strangers of god  
Are in apart of me  
I wanna wish  
And I want you  
In my fantasy  
But still ain't me  
That thinks  
That this could be something forever  
Rumbled in the studio  
Forever any whether  
My last girl was a singer  
I want another singer  
But you are like an angel  
Heaven you're no stranger  
To god but you're to me  
No I think I've seen you before  
Maybe in my dreams or in my head  
I want to hold  
Your long ass like a ho  
But I won't be here long  
So you can take this song  
Play it on the road  
Use it as a booster  
Fuck them other bitches  
Your the one  
That's in my future  
Gucci cardiac  
I need some doses  
When I'm patient  
Maybe cause I'm young  
But now these days  
I'm very blatant  
Yes girl  
I've been waitin'  
Just to tell you that

All stars  
You'll be there  
In the end  
And take me back again

You're the perfect end
