

# Satellite

Bipolar Sunshine

You know  
We all want to feel  
We all want to feel something  
Something real

I'll be your satellite  
Just dance and shine on me  
When you feel down and I'm around  
You can just count on me  
I'll be your satellite  
I'll be the one you need  
When you look up, up to the sky you'll see

I'll be your satellite  
I'll be your satellite  
I will be your satellite  
I'll be your satellite

I know  
You're always there  
Out in  
The atmosphere

I'll be your satellite  
Just dance and shine on me  
When you feel down and I'm around  
You can just count on me  
I'll be your satellite  
I'll be the one you need  
When you look up, up to the sky you'll see

I'll be your satellite  
I'll be your satellite  
I will be your satellite  
I'll be your satellite

I'll be your satellite  
I'll be your satellite  
I will be your satellite  
I'll be your satellite
