

Two of Us

Birds of Tokyo

The two of us
Have seen it all
Our story's been heartache and wonder
This universe
Ain't big enough
To keep us apart no not ever

How many times did we stumble
How many times was it worth every fall
There's just something that keeps us together
Whenever my world moves from yours

I will always be with you
Got your name on my heart
In the shape of a tattoo
It's my favourite piece of art
There is nothing like you in this world that I know
Darling I will never let you go
I will always be with you
You will always be here in my heart

The two of us
We got it all
Don't need no designer distractions
Cause in the end
I found a friend
My one and my only obsession

How many times did we stumble
How many times was it worth every fall
There's just something that keeps us together
Whenever my world moves from yours

I will always be with you
Got your name on my heart
In the shape of a tattoo
It's my favourite piece of art
There is nothing like you in this world that I know
Darling I will never let you go
I will always be with you
You will always be here in my heart

Come and join me in this dance
An impossible romance
Take one step at time and don't let go

I will always be with you
Got your name on my heart
In the shape of a tattoo
It's my favourite piece of art
There is nothing like you in this world that I know
Darling I will never let you go
I will always be with you
You will always be here in my heart

You will always be here in my heart
You will always be here in my heart
