

All I'll Ever Know

Bizzy Bone

You create the world of the dream
You bring the subject into that dream
And they fill it with their subconscious
Dreams, they feel real while we're in them right
It's only when we wake up we realize something was actually strange

You came into my dreams
Now the darkness consumes everything
My life will never be the same, no
It's safe to say, that this pain
This pain is all I'll ever know
All I'll ever know
