

Think It Over

Black Box

You gotta understand, yes you do,
I just think it's over

You know I'm your destination
But you keep on playing it cool
And the night is just a sensation
I know it's calling for you

Don't you think that is the right direction
Could just be going far out of the way
I thought was had a good chance,
You say you've gotta go
That's why I tried

You might think it too
I mean you are the one
Who'll by my man forever
My temptation

You gotta understand, so think it over...
Got to understand

You know my dream is perfection
All the same I'm thinking of you
And the night is like an obsession
A precious jewel for you

Can't you see that is the right direction
Could just be going far out of the way
I thought was had a good chance,
You say you've gotta go
That's why I tried

You might think it too
I mean you are the one
Who'll by my man forever
My temptation

You gotta understand, so think it over...
Well I'm gonna have to choose between my liberty and you
You told me think it over, there was nothing I could do
Lay back relax and let love take over
No need to wait until am older
Or bolder I told ya all I wanna do is hold ya
Oh girl I feel the vibes let's rock and rolla
Just lay 'n my shoulder and love me right
Come closer and I'll think it over

You might think it too
I mean you are the one
Who'll by my man forever
My temptation

Gotta understand, gotta understand...
