

With You

Black Buddafly

Baby I love you but I love us more together
Cause we've been through it all name any kind of stormy weather
When the rain came down, almost drowned but you kept me dry
And even now you're on the other side I still feel like

You're just like the sun in my sky
Boy you're stuck with me for a lifetime
And I'll be your moon always shine for for
You when your pathway is dark
When you be down and don't know where to start
Just call on me wherever you are
(Are)

Wherever you are, you are, you are
You are, you are
You are, you are, you are
Wherever you are
(I'm there with you)
You are
(Right there I'm with you)
You are
(I'm here for you)
You are
(I'm right there with you)
You are
(I'm there with you)
You are
(Right there I'm with you)
You are
(I'm here for you)
You are
(I'm right there with you)

Baby I love us now but I love what's coming better
Cause we're riding the wave and I wanna ride next to you forever
Though the shore means we bout to crash you holding me close
And neither one of us has to guess
We're one and we know

You're just like the sun in my sky
Boy you're stuck with me for a lifetime
And I'll be your moon always shine for for
You when your pathway is dark
When you be down and don't know where to start
Just call on me wherever you are
(Are)

Wherever you are, you are, you are
You are, you are
You are, you are, you are
Wherever you are
(I'm there with you)
You are
(Right there I'm with you)
You are
(I'm here for you)
You are

(I'm right there with you)
You are
(I'm there with you)
You are
(Right there I'm with you)
You are
(I'm here for you)
You are
(I'm right there with you)
