

I've Heard It Before

Black Flag

I've heard it before
I don't want to hear it again
I've heard it before
I just want to shut you up

Fuck all you people who can't see my side
I've got my own strategies for my life
I've seen the emptiness in your ways
Don't tell me how to make my way

I've heard it before
I don't want to hear it again
I've heard it before
I just want to shut you up

Pressure rising pressure falling almost everyday
Going clear outta my mind Oh god another day
Don't forget you socks don't forget your shoes
Mamas little baby, fuck no

I've heard it before
I don't want to hear it again
I've heard it before
I just want to shut you up

Fuck all you people who can't see my side
I've got my own strategies for my life
I've seen the emptiness in your ways
Don't tell me how to make my way

I've heard it before
