

Wallow in Despair

Black Flag

You really crack me up
You really crack me up
You really crack me up when you speak like you mean it
When I know you don't really care
You really crack me up when you come come come
For something besides me to care

You really crack me up
You really crack me up
You really crack me up when you cry about nothing
And wallow in despair
Wallow in despair
Wallow in despair
Wallow in despair

Oh yeah, buddy, you crack me up!...

You really crack me up
You really crack me up
You really crack me up
You crack me up when you say you care
You crack me up in your easy chair
You really crack me up when you whine about everything
And wallow in despair
Wallow in despair
Wallow in despair
Wallow in despair
