

It's my favorite thing
just sitting watching you sleeping
the secrets you keep
go on and keep them someday you won't need them

you always say I'm always gone
but you're always here in my heart
hey there child, hey there star
I promise to never be far

I will always take care of you
most of the time I'm just grinding through my day
trying to head your way
and most of the time I'm just trying in my way
to keep the pain at bay

you always think I'm always gone
but you're always here in my heart
hey there child, hey there star
I promise I'll never be far
I will always take care of you
yes I will
I will always take care of you
yes I will

I will always
I will always
I will always
I will always
