

Down to the River

Black Lab

I am no survivor
Nothing here survived
Dying on that road with you
Dissolving in that fire
So how do I go forward dear when
You were my whole life

I go down to the river without you
I go down to the river without you
I go down to the river without you
I lay down

I go down to the river without you
I go down to the river without you
I lay down

Too weak to remember
Too sad to forget
Rushing down the steepness
To feed and to be fed
So if I beg you one more time
To lay me down to rest

Go go go and find it
Don't come home without it
In these weaker moments leave it there
So thin the air, the wall, the will to move on
So thin the air

I go down to the river without you
I go down to the river without you
I go down to the river without you
I lay down

I go down to the river without you
I go down to the river without you
I lay down
