Give It All To You

Black Lab

I take one step
One look, one breath
I come down
Brick by brick by brick
I run until I slip
It still comes down to this

If I give it all to you
If I fall in front of you
Would you show me everything
That lies beneath this black and blue
I'll give it all to you my love
If I give it all to you
If I hand over what's due
Tear down the walls
That rise and fall
Between the truth
I'll give it all to you my love

I can see your backbone working
Reaching up for what it's worth
And these stars
A million miles around us
They're flying around us
They're flying around us

If I give it all to you
If I fall in front of you
Would you show me everything
That lies beneath this black and blue
I'll give it all to you my love
If I give it all to you
If I hand over what's due
Tear down the walls
That rise and fall
Between me and you
I'll give it all to you my love
My love, my love...
