

Slow Down

Black Lab

Even at the bottom of midnight
When you've watched me come undone
Even under cover of daylight
When I've buttoned up my tongue

I'm living in a world of stage fright
While you wait to see me undefended not pretending now

So put your arms around this hollow
Like a castle made of sand
Put a wall between this sorrow
And the riches in my hands
It's about as far as I go
To let you see my heart again
It walks beside this frozen road

Slow down keep your eyes on me
Slow down cause you're almost free
And all I want yeah all I need to say
It's not so far away
It's not so far away

So high that you can't get over
And closer than your breath
So low that you can't get under
The moment of your death
I did not come here for saving
I'm just trying to accept
The way it is the way it is

Slow down keep your eyes on me
Slow down cause you're almost free
And all I want yeah all I need to say
You're not so far away
You're not so far away
