

Sugar

Black Lab

I know heaven's a long ways away
Give us sugar, give us sugar
I know heaven's a long ways away
Give us sugar, give us sugar

Super girl in a sticky dress
Hanging out of a little leather vest
You dream at night of her beautiful lips
You want to die in the swing of her hips
Walk straight, straight, head high
Look her straight on
When you tell her those sweet lies

I know heaven's a long ways away
Give us sugar, give us sugar
I know heaven's a long ways away
Give us sugar, give us sugar

If I set myself on fire for you
Walk on the water like Jesus used to do
Would you forgive me and forget where I've been?
Yeah, would you let me back into your skin?
Walk straight, straight, head high
Look her straight on
When you tell her those sweet lies

I know heaven's a long ways away
Give us sugar, give us sugar
I know heaven's a long ways away
Give us sugar, give us sugar

And the Lord won't wait too long
And I'm almost home
And the Lord won't wait too long
And I'm almost coming home
Give us sugar, amen
Give us sugar, amen

I know heaven's a long ways away
Give us sugar, give us sugar
I know heaven's a long ways away
Give us sugar, give us sugar
