

Tell A Lie

Black Lab

I tell a lie to myself
And no one else knows this seventh hell
And I go blind from what I've done
And this fire devours me
I can't face myself for all this blood

I tell a lie to get me through this night
And we get by, we all gotta survive

I tell a lie to your face
And no one doubts me it gets erased
No one holds me, no one else can see

I tell a lie to get me through this night
And we all get by, we all gotta survive

I tell a lie to get me through this night
And we all get by, we all gotta survive
We all gotta survive
We all gotta survive
I tell a lie
