

## Forever Down

**Black Label Society**

Take a look inside the warped and the sick  
Forever born again just to die so quick  
The floodgates of the damned  
Shall crash and burn once again  
Nuclear obsession the fall of the weak  
Atomic demolition destroy all you seek  
The flood gates of the damned  
Shall crash and burn once again

Down down down  
Forever down

Terrified reflections that rip through the sky  
Apocalyptic birth the screams and the cries  
Floodgates of the damned  
Shall crash and burn once again  
The reverend of the grave, the mother of the end  
The wings of the bastard shall spread once again
