

Chainsaw

Black Lips

Do you remember?
It's hard to forget
The lead was broken
And you lost your friend

The gate was left open
Rush hour traffic on the street
The clouds in the sky, they were chokin'
With the rain that would put you to sleep

And it's hard to know that you've gone away
And it's hard to know that you've gone away
You lead me through the gate that was open
Alone without you

And I'll keep callin' you
And you might hear your name
If you're lost or had to go
To me, it's both the same

Do you remember?
It's hard to forget
The same day that you left me
Feels like the same day we met

And it's hard to know that you've gone away
And it's hard to know that you've gone away
You lead me through the gate that was opened
Alone without you

And I'll keep callin' you
And you might hear your name
If you're lost or had to go
To me, it's both the same
And I'll keep callin' you
And you might hear your name
If you're lost or had to go
I hope you took a train
