

## Rules

Black 'N Blue

What I find in you's no surprise (it's no surprise)  
I don't even think you listen  
Thought you saw through my disguise (through my disguise)  
It doesn't matter, you're days are numbered

You handle my life like rolling dice  
But give me time, you'll see  
I don't need you and your advice  
You can't cage me

We have the right to our freedom  
This is the life we choose  
We never asked for you and all your rules

Tried to label and number me (tried to label me)  
Do you even know what you're saying  
You are worse than I'll ever be (worse than I'll ever be)  
So the rest of us all are praying

You shattered my mind like broken glass  
And I won't play your game  
My lucky stars have all been smashed  
And it's you that I blame

We have the right to our freedom  
This is the life we choose  
We never asked for you and all your rules

(Solo)

We have the right to our freedom  
This is the life we choose  
We never asked for you and all your rules

We never asked for you and all your rules, rules
