

## To Make Us What We Are

Black Oak Arkansas

Work all day, party all night  
tryin our best just to make things right  
the stars are turnin and the world is  
burnin  
this fire's just a justice flight

Bring you to our hearts throw you to the  
sky  
all you do is wonder why  
we'll try to reveal that magic seal  
but always remember that we are real

The thickness of water  
the wind of air  
a pinch of fire and the potions there  
to make our miracles  
to make your happy smiles  
to make light year miles  
to make us what we are

To make you aware magic is there  
or do you care what we can share  
believe in spirits yes believe your near it  
we're on earth to learn what love is worth

Feel the power a saint can feel  
then remember that you are real  
let's be together let's be as one  
we'll shine as bright as any sun

The thickness of water  
the wind of air  
a pinch of fire and the potions there  
to make our miracles  
to make your happy smiles  
to make light year miles  
to make us what we are
