Don't Ask Why

Black Pistol Fire

I got you in my sights
It don't come easy so believe me when I say it's all a lie
I never run before another man for all my life
Until I saw you mystic dudes and a dagger in your smile
And mama said baby don't you ever play with fire

So do yourself a little favor and don't ask why
A truth be told it was all just a matter of time
So do yourself a little favor and don't ask why
A truth be told it was all just a matter of
Time before we say our last goodbyes
The thrill is gone and I don't ever ask her why

So sit and watch me bleed
It's hard to breathe when we're in a sea of fucked up dreams
Coming on back to just have you kicking dirt in my teeth
I never run before another man for all my life
And mama said baby don't you ever play with fire

So do yourself a little favor and don't ask why
A truth be told it was all just a matter of time
So do yourself a little favor and don't ask why
A truth be told it was all just a matter of
Time before we say our last goodbyes
She got no love and I don't ever ask her why

I never run before another man for all of my life
And mama said baby don't you ever play with fire
So do yourself a little favor and don't ask why
A truth be told it was all just a matter of time
So do yourself a little favor and don't ask why
A truth be told it was all just a matter of time
