

The Chain

Black Stone Cherry

One in the chamber, five on the ground now
Another's dead, that six gun sound pow
You heard just what I said, I ain't gon' re-re-repeat it
God as my witness, we got to learn how
To fight for one another, to be a better brother

Right now it's time to stand out
Without religion to blame, we are all one in the same
Let go of all you can't control
Until we all make a change, we are just links in the chain

Witness protection, but no one knows how
They stay elected, then say our vote counts
You heard just what I said, I ain't gon' re-re-repeat it
Ain't no protection, and no one knows how
To fight for one another, to be a better brother

Right now it's time to stand out
Without religion to blame, we are all one in the same
Let go of all you can't control
Until we all make a change, we are just links in the chain

Right now it's time to stand out
Without religion to blame, we are all one in the same
Let go of all you can't control
Until we all make a change, we are just links in the chain
