

Unless We Change

Black Swan

I stand before you naked and alone
You find me guilty of a crime I haven't done
You build your gallows drag me up that hill
A thousand years from now won't change a god damn thing

Hungry for the game
The witness calls my name
In search of paradise
Like lambs to the sacrifice

And the worlds forever strange (unless we change)
Unless we change (aah)
Take this pain away from me (unless we change)
The anguish that I feel
The taste of bitter tears
The highs the lows that make me suffer
Unless we change

The cities burnin' the mob is on the move
My stomach's turnin' from everythin' we lose
This raging fire is choking me to death
The devils smiling now he's got us in his grip

I hear the angels sing
Hallelujah praise his name
Every living thing
Rise up and start again

And the worlds forever strange (unless we change)
Unless we change (aah)
Take this pain away from me (unless we change)
The anguish that I feel
The taste of bitter tears
The highs the lows that make me suffer
Unless we change

Survival... confusion
The anger... we're disillusioned
Shout! Gotta break out!
Burn it down... or we turn this thing around

And the worlds forever strange (unless we change)
Unless we change (aah)
Take this pain away from me (unless we change)
The anguish that I feel
The taste of bitter tears
The highs the lows that make me suffer
Unless we change
