

Coma

Black Tongue

Fuck this world
I'm so sick of your temporary bullshit
I want the light at the end
And I know how to get it
If it takes my life then I will gladly die

Open your mind
Realise we are slaves
Forced Draconian mind-state
Open your eyes
We live in a world made of smoke and mirrors

Bear witness to the problem at hand
Open your eyes
Bear witness to the sickness of man

Martyr Defiled, Black Tongue
Beast from the fucking East
L-Town to Hull City Hate
Motherfucker you know what time it is
This time
Our time
Set it up

You spend your lives trying to survive
You spend your days wasting away
I can't take this any longer
What doesn't kill you doesn't make you stronger

Just wake up
There is no happiness
There is no love
Ash and the void
Extinguished suns
Rent flesh and blood

We spend our lives trying to survive
We spend our days wasting away
We can't take this any longer
What doesn't kill you doesn't make you stronger

Martyr, I have become
My light is dying inside
Blackened the sun
Martyr, I have become

Send me to Hell
'Cause I don't give a fuck

Open your eyes
Bear witness to the problem at hand
Open your eyes
Bear witness to the sickness of man

I'm so sick of this temporary bullshit
I want the light at the end
And I know how to get it

If you could glimpse at the world inside my head
You'd scream until your lungs collapsed

Open your eyes

Martyr
I have become
My light is dying inside
Blackened the sun
Martyr
I have become

Send me to Hell
'Cause I don't give a fuck
