

Sleep Together

Black

When I wake up in the morning
I can smell you in my hair
I can smell you on my pillow
Long after you are there
Sleep together
We sleep together
Straight on 'til darkness shows
Let your heart be your witness
As we think so we are ;
Two fools
wishing on a long dead star

Sleep

I hear you breathe in the dark
And I know what you know
Let the silent river flow

The lovers' starlit crossfire
The dreamers singing "As My Heart is My Witness"
I cannot see so far
Can't hide in your arms

Let
the silent river flow

sleep

We sleep together
