

## Inspired By

Blackalicious

First crime I would commit  
It was a misdemeanor  
No loot on me so I had gaffle  
Step in the arena  
Musically, I fell in a trance  
I thought of X2C, but  
He said "Is this as fresh to you  
As this is fresh to me, bruh?"  
Then album by album I get cds and did some refer  
Consistency. Essential beats and rhymes. This shit was ether  
Went from them battle rhymes to trying to make a dope LP  
Thanks for the inspiration  
Those departed, rest in peace

Inspired by the ones who do it for the love of the game  
Inspired by the fly moves you set it off in the game  
Full inspired by the creative forces that reign above the globe and saved the day

Inspired by the culture way before we all could get paid  
Inspired by the greats who made the classic music we played  
Inspired by the fans who came to see the music displayed  
The styles unfurl in mass array

I never knew  
(I never knew)  
A singer could  
Be like a tool  
For grounding spirits  
To the truth  
Every living  
Ritual  
A tribute to  
A mystic mover  
For the first time  
I listened to it  
I was so high  
But not on thai  
It was like I was speaking through it  
On my job  
Felt like it was a day off  
From the Natural Mystic in the air that left the Sheriff lost  
In the essence. No question  
The timelessness lives on  
Thank you for the inspiration  
We forever jamming on, too!

It's Blacka singing  
Thank you for the inspiration  
It's because of all of y'all we doing more than just a day job  
Yeah, this took awhile  
We thank you for your patience  
Every time that life is sucking, you remind and motivate us  
That this is for a purpose  
So after drinks are purchased  
And all the bubbles fizz away the cream will always surface  
Thank you for your inspiration  
Until further indication  
We keep murdering the fake  
Until it's done and OVER!

We are inspired by you  
We walk in your footsteps  
We stand on your shoulders  
Now we reach to levels that never been touched  
Adrenaline rush whoa we're inspired by
