

## Impossible to love

Blackbear

I will take the stars  
I'll seal them from the night  
and I will sing the blues  
for you in black and white

if I could be by your side tonight  
if I can hold you one last time  
if I could look into those eyes  
if I could be by your side tonight

and you, you're incredible my little miracle  
you're impossible, impossible to love

I'm still wondering where you are  
it's been longer than it seems  
cause one night you're in my arms  
and next you're in my dreams  
and it's driving me insane  
every night turns another day  
and you're further and further away  
from Dallas to L.A.

and i'd give up all my world  
if i could call you mine  
and i 'd break off half my heart  
if i could call you mine  
if you could be by my side tonight  
if you could be by my side tonight  
if i can hold you one last time  
if you could be by my side tonight  
be by my side  
be by my side tonight  
you're incredible my little miracle  
you're impossible, impossible to love  
you're incredible my little miracle  
impossible  
impossible to love  
you're impossible, impossible to love
