

# painkiller

Blackbear

I think I used up all my sick days  
Excuses are gone  
It was such a good day till I threw up in the car  
Three years clean and nothing changed  
There's dishes in the sink  
Three more days without you here and I might need a drink

And I can't lie, you still get me high  
I need something with a little more strength  
I need something else to get me by  
You're my painkiller

Will you be my Oxy? Will you be my Vicodin?  
Be my euphoria? Stay through the night again?  
You're my painkiller (Will you kill my pain?)  
Will you kill my pain?

So, I took another sick day, I hate LA when it's dark  
Methadone clinic, using tissue for a scar  
Three more days without you here  
I'm going through withdrawal  
Three more days seem like forever, I wonder where you are

And I can't lie, you still get me high  
I need something with a little more strength  
I need something else to get me by  
You're my painkiller

Will you be my Oxy? Will you be my Vicodin?  
Be my euphoria? Stay through the night again?  
You're my painkiller (Will you kill my pain?)  
Will you kill my pain?

I need you like a needle in my veins, it's a crisis  
You're no longer welcome 'round my friends, you're uninvited  
Every time you we drove up Laurel Canyon, it was priceless and timeless  
Now everything means nothing so

Will you be my Oxy? Will you be my Vicodin?  
Be my euphoria? Stay through the night again?  
You're my painkiller (Will you kill my pain?)  
Will you kill my pain?

Will you kill my pain?  
Will you be my Oxy? Will you be my Vicodin?  
Be my euphoria? Stay through the night again?  
You're my painkiller (Will you kill my pain?)  
Will you kill my pain?

Yeah, yeah-ah-ah-ah  
Will you kill my pain?  
Will you kill my pain?
