

Pangaea

Blackbear

Pangaea, we just fell apart
Plate tectonics looking like my heart
Whole world dropped
Thought we were the same but we're different
Guess I couldn't handle the distance
Pangaea, we just fell apart
Yeah, we were drifting away from the start
Whole world dropped
Thought we were the same but were different
Guess I couldn't handle the distance

Pangaea, always taking off when I need ya
See ya, I'm onto the next, nice to meet you
Thought we were the best, I was wrong
We were just a mess all along

If I said I'm leaving, would you stay with me tonight?
Cuz I've got a feeling that the ground might just divide

Pangaea, we just fell apart
Plate tectonics looking like my heart
Whole world dropped
Thought we were the same but we're different
Guess I couldn't handle the distance
Pangaea, we just fell apart
Yeah, we were drifting away from the start
Whole world dropped
Thought we were the same but were different
Guess I couldn't handle the distance

Got me picking up the pieces of my heart, no lie
Got me reaching for the stars, you set the bar so high
Pangaea, ripping out my heart, now we distant
Maybe you just love the attention, don't mention
That every time you walked away, I took you back, no question
Never had to worry 'bout these girls or my intentions
I meant it, I'm sad as fuck and rolling up alone inside my car
Pangaea, we was doomed from the start

Pangaea, we just fell apart
Plate tectonics looking like my heart
Whole world dropped
Thought we were the same but we're different
Guess I couldn't handle the distance
Pangaea, we just fell apart
Yeah, we were drifting away from the start
Whole world dropped
Thought we were the same but were different
Guess I couldn't handle the distance
