

Sleep 4Ever

Blackbear

Baby we could sleep forever, forever, forever
Fall into our dreams together, together, together
Baby we could sleep forever, forever, forever
Fall into our dreams together, together, together

I've been holding onto something
Stand me up, my legs, they're broken
When I met you I fell in love
Now I'm skeptical about us

Working out this shit ain't easy
Had my doubts, you make me hate these

Baby we could sleep forever, forever, forever
Fall into our dreams together, together, together
Baby we could sleep forever, forever, forever
Fall into our dreams together, together, together

I wish I could sleep forever
Lucid dream so we can be together again
This pain is all that I have left to remember
I wish that I could spend eternity inside of your head

But I'm stuck here in the past reminiscing again
We saw inside of each other how can we just be friends
All my texts is turning green I'm like this doesn't make sense
I caught these feelings, should be catching Z's inside of my bed

Baby we could sleep forever, forever, forever
Fall into our dreams together, together, together
Baby we could sleep forever, forever, forever
Fall into our dreams together, together, together

Together, together
Together, together
Together
