

## Morningside

Blackberry Smoke

Dark comes rollin' in like a cannonball  
Rising of the tide, it can move us all  
It can move us all  
As far as you can see, stretched far and wide  
Our own worst enemy from deep inside  
Deep down inside

Nothing's ever over, it just moves around you'll find  
That the light is shining somewhere on somebody all the time  
I'm not stumbling in the darkness  
I'm just waiting for the morning-side

Too far down to fall, that might well be  
I believe I can get us through, just take a hold of me  
Take a hold of me

Nothing's ever over, it just moves around you'll find  
That the light is shining somewhere on somebody all the time  
I'm not stumbling in the darkness  
I'm just waiting for the morning-side

Nothing's ever over, it just moves around you'll find  
That the light is shining somewhere on somebody all the time  
I'm not stumbling in the darkness  
I'm just waiting for the morning-side

The morning-side  
Waiting for the morning-side
