

Everybody Talk About

Blackboard Jungle

Sometimes I think this town talks too much
Sometimes I wanna scream for you all to shut up
I too plead guilty to the crimes above
Does my hypocrosy feed you up
Everybody's nature, everybody's business

Everybody talk about who shot the gun
Everybody talk about they're number one
Body side the road all look to see
Everybody talk about you about me, yeah
Just keep talkin'

They talk shit about me, I talk shit about you
In the end there's nothing you can do
Cause voices carry oh so far
And old bedtime stories they seem so bizarre
Everybody's nature, everybody's business

Everybody talk about who shot the gun
Everybody talk about they're number one
Body side the road all look to see
Everybody talk about you about me, yeah
Just keep talkin'

Everybody talk about who shot the gun
Everybody talk like they're number one
Everybody talk about their point of view
Everybody talk about yesterday's news
So much talk so little to see
Everybody talk about you about...

Everybody talk about who shot the gun
Everybody talk about they're number one
Body side the road all look to see
Everybody talk about you about me, yeah
Just keep talkin'

Everybody talk about you about me

Voices carry oh so far
