

# Tonight

Blackfoot

Moon is bright  
And the stars my guiding light  
Tonight  
Would you believe  
I'm getting closer mile by mile  
Tonight

But I'll be O.K.  
As long as I know you have stayed  
Tonight

In the skies I see you face on every cloud  
I'm hypnotized with the thought of you tonight

Lonely nights away  
But I know I'm in your heart  
Tonight

And you should know  
That I've missed you from the start  
Oh tonight

It's your touch that I miss and the goodnight kiss  
I had to call you see to let you know what you mean to me

So turn off the light  
And you know I'll be alright  
Tonight

And sleep peacefully  
When you wake you know you'll see  
Me tonight  
Tonight, tonight  
Tonight, tonight
